**A 3 WEEK**

# **INTERNATIONAL SUMMER SCHOOL 2025**

**IN COLLABORATION WITH**

**JULY 01 - JULY 21  
2025  
Mode : Virtual**

## About The Summit 17

The Summit 17 is a global youth-led organization dedicated to driving action on all 17 Sustainable Development Goals (SDGs). With active chapters in India, Bangladesh, Ghana, Kenya, and Nepal, we work towards creating impactful initiatives in collaboration with international organizations like UNESCO and UNDP. Our mission is to empower changemakers by providing them with the knowledge, skills, and networks necessary to address global challenges.

Through our Projects, Conferences, Research Programs & Training Sessions, we equip individuals with the leadership and strategic thinking required to create sustainable solutions. The Summit 17 fosters innovation and policy-driven change, making it a hub for young leaders dedicated to making a difference.

## About the International Summer School 2025

The International Summer School 2025 will offer an enriching and immersive experience designed to spark awareness, action, and innovation across a range of pressing global themes. Participants will engage in meaningful discussions on mental health, exploring the emotional and psychological struggles faced by individuals today while learning holistic approaches like meditation as powerful tools for healing and daily mindfulness. The journey continues with conversations on food security, focusing on sustainable agricultural practices and innovative solutions like campus farming to combat hunger and promote healthier lifestyles. Climate action takes center stage as youth-led zero-waste initiatives and smart waste management techniques are highlighted to inspire greener habits. As the program progresses, participants will dive into the evolving landscape of artificial intelligence, exploring its role in future business models and the leadership skills necessary to thrive in AI-driven careers. The importance of digital and financial literacy will be examined as vital tools for sustainable development, especially in a tech-forward world. Infrastructure and industrial growth are explored through the lens of sustainability, introducing modern waste management practices and the role of data science in shaping a cleaner future. The program culminates with an emphasis on inclusivity, shining a light on animal welfare, the fight against gender-based harassment amplified by social media algorithms, and the need to break stereotypes around disability and diversity. Special attention is given to women's empowerment, highlighting both barriers and breakthrough case studies in leadership and economic inclusion. With a perfect blend of understanding the root causes of global issues and exploring innovative, solution-oriented approaches, this summer school is a dynamic platform to inform, inspire, and ignite change for a more sustainable and equitable future.

## This program is a unique opportunity to:

- Learn from renowned Global Leaders, Industry Experts, Economists, Policymakers, Academicians, and Legal Professionals.
- Gain hands-on experience through Case Studies, Discussions & Interactive Sessions.
- Network with like-minded individuals across the world.
- Receive a **certificate from The Summit 17 & UNESCO upon completion.**

## General Guidelines for Participants

- The summer school is open to individuals from all academic and professional backgrounds.
- The program will be conducted completely online for accessibility.
- Sessions will be live and interactive, featuring expert-led discussions, Q&A segments, and group activities.
- Participants will receive reading materials, video resources, and additional study guides after each session.
- Attendance is mandatory for at least 80% of the sessions to receive certification.
- Participants will have to submit the assign work after every week.
- All sessions will be held every Saturday and Sunday each week.

**Note:** Participants will receive the detailed itinerary one week prior to the commencement of the summer school.

## Program Structure: How It Takes Place in 3 Weeks

The International Summer School 2025 is structured to progressively build participants knowledge and skills, moving from fundamental concepts to real-world applications.

### Week 1: Mind, Climate Action, and Wellness
